Forecast for Thursday 18 Apr 2024

Weather: Fine and frosty first thing, perhaps some shallow mist and fog in sheltered valleys but clearing quickly into the morning as temperatures rise. Cloud spreading from the northwest later in the monring, with strengthening westerly winds bringing spells of generally light rain during the afternoon. Rain perhaps briefly wintry over the highest tops to start and drizzle becoming locally more persistent as cloud descends into the evening to give a dull end to the day.

Chance of cloud-free hill tops above 800m: 95% at dawn falling to 20% by the end of the day.

Low Cloud and visibility: Largely cloud-free to start, thickening and lowering from the north and west through the afternoon with cloud bases lowering towards 500-600m by dusk and locally lower for some northern slopes. Very good visibility falling to good, locally moderate in more persistent light rain and drizzle later, poor in cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

The UV index will be moderate into the late morning, with low temperatures and notable windchill perhaps masking the effect of the sun.

Forecast for Friday 19 Apr 2024

Weather: Overnight cloud and rain giving way to clearing skies and scattered showers through the morning. Drier into the afternoon with plenty of sunshine but temperatures remaining on the cool side.

Maximum wind: NNW'ly 20-25mph gusting 40-45mph initially, easing through the day.

Chance of cloud-free hill tops above 800m: 10% becoming 90% into the afternoon.

Low Cloud and visibility: Widespread cloud down to 300-400m to start, lifting and breaking above summits into the afternoon. Visibility locally poor or very poor at height during the morning but becoming good.

Temperature: **Valleys:** Plus 8 becoming 11 Celsius.
At 800m: Plus 1-2 Celsius
Freezing level: 1500m becoming 1000m.
